

Abrasives In Action

From The Abrasive Solutions Company

Garryson MX

Specifically Designed For Cleaning Seat Tracks In Aircraft Maintenance

Garryson MX seat track cleaners are specially designed to provide one easy to use product to clean out seat tracks on aircraft quickly and effectively.

Application

Garryson MX seat track cleaners have been designed for no other application other than to remove caked on dirt and grime from all the interior surfaces of aircraft seat tracks. Existing methods typically involve 2 or 3 different products, each to clean a particular surface of the track. Now Garryson offer one simple to use product that cleans all surfaces. This avoids buying multiple products and wasting time changing products.

Garryson MX is a cotton fibre reinforced abrasives containing a tough aluminium oxide mineral impregnated into the cotton fibre and bonded by durable resin. The Garryson MX seat track cleaner is mounted on a 6mm shank and is used on a straight line die grinder.

Product Specifications:

Part No	Size	Grade	Shank	Max RPM	Pack QTY
MXMP1070 (A54 GFX)	"W" 0.750 x 0.098	A54 GFX Heavy cleaning application	6mm	34,500	10
