

Finishing Discs and Lap Mops

Manufactured from tough reinforced nylon fibre providing a flexible conformable product.

Ideal for

- Stainless steel or aluminium light deburring, blending, cleaning and finishing applications

Applications

- Blending minor surface imperfections and handling marks
- Removing small burrs, parting lines, flashing from castings, mouldings and threaded pipes
- Removing and cleaning minor surface oxidation, surface coatings, light rust

Finishes

- Applying grain finishing on stainless steel after weld removal
- Cosmetic finishing on aluminium castings
