flexidisc[®]

conforming to customer demands

A flexible disc ideal for blending, finishing and cleaning on contoured surfaces that reduces the risk of undercutting & gouging. Flexidisc[®] now features a new construction providing longer life and more robustness.

Patented: GB2349109 EP1173309 Other patents pending.

flexidisc®

**new
improved**

ideal for blending, finishing and cleaning on contoured surfaces

Resin Fibre Disc

maximum flexibility

Compared to resin fibre disc ensures improved blending, more control, finer finishing

maximum performance

Flexidisc® reduces the risk of under cutting, gouging or producing 'flats' on contoured surfaces

maximum output

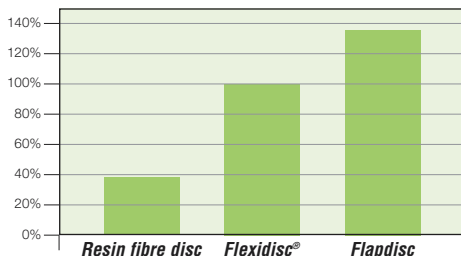

Unique patented construction provides significantly longer disc life compared to resin fibre discs

Flexidisc®

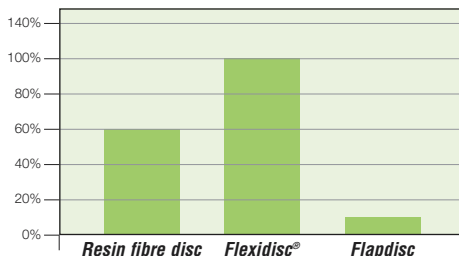

Performance

Life

Flexibility

Industry Applications

Large area blending & finishing, Weld preparation, Blending & finishing of pipe joints, Finishing of formed/shaped surfaces, Removal of casting deposits, Removal of machining marks, Corrosion & paint removal
